[-139 μ K, -31 μ K]

1'

The image shows a field of galaxies with several bright yellow and white galaxies concentrated in the center. Overlaid on the image are several concentric white contours that represent the cluster's density profile. The contours are roughly elliptical and centered on the main concentration of galaxies. A scale bar in the bottom right corner indicates a length of 1 arcminute. The background is dark with many faint, multi-colored galaxies scattered throughout.
